

Newsletter

Our lives become beautiful not because we are perfect. Our lives become beautiful because we put our hearts into whatever we do. Education is not the learning of facts, but the training of the mind to think. At DPS SEC84 we do not prepare students for something but we help them to prepare themselves for anything. Students must be taught how to think not what to think. We believe tomorrow belongs to the students who prepare for it today.

Achievement

It gives us immense pleasure to inform that- **Tanvi Bathla of grade IX and Manvi of grade IV** achieved the scholarship of Excellence in SOF for English subject wherein they have proved their proficiency in the subject .We congratulate them and wish they keep soaring high.

Heartiest congratulations! To **Aarav Arora** for his glorious achievement. We are proud of you. We congratulate you for the success today which marks a beginning for tomorrow.

Achievement

*We congratulate the SOF
National Science Olympiad Winners.*

Achievement

It's your dedication that contributed to our success. Thank you for inspiring us! We appreciate **Ms. Kinni Arora** for participating in the **International Geo Gebra Conference**, India which was held online during 11- 13 March, 2021.

Webinar

What Motivates Us- Grades 7 & 8

The sessions addressed the students to think, learn, communicate and connect.

The students were taught about motivation, the different types of motivation and how they influence us to learn and achieve our goals. A learner's beliefs and values about his/her own competence and the preexisting interests they bring to a particular learning situation all influence motivation. The importance of goals was also discussed as they guide decisions about whether to expend effort and how to direct attention, foster planning, influence responses to failure, and promote other behaviours important for learning. A real life video clip was also shown that had set in motion action of the students. The interactive class led students to answer what motivates them intrinsically and extrinsically to complete a task.

Fortis Webinar- Grades 5 to 10

By Tanvi Seth, counseling psychologist, Fortis Hospital.

The webinar highlighted how we need to hack into our brains for effective study. For this, we require to break up our learning into small chunks because this can greatly enhance focus. **Sleep is essential for successful learning because the process of consolidating short-term memories to long-term ones happens in part during sleep.** The students were also asked to teach a topic you're learning to someone else (or pretend to do so) as this could possibly be the result of retrieving what we have previously learned, rather than passively re-reading the material. In other words, it is a way of testing ourselves without actually doing so. The webinar also talked about the different methods of study and how organizing the study space and use of flow charts and diagrams are effective to enhance study during exam time.

Webinar

Cognition & Learning- Grades 9 & 10

The session was taken on this where several principles of better ways of thinking were shared that can be applied to get more from the mind such as keeping a tab on our emotions, studying our emotions and engaging in introspection. How the mindset can be nurtured through competition with self to develop a better version and feedback from failure. The presentation also talked about how learning is affected, the importance of practice and the different psychological strategies of learning such as mnemonics and associations.

Power of Gratitude- Grades 1 & 2

The session talked about the meaning of gratitude and the ways to incorporate gratitude in our lives. The focus was also on benefits of being grateful which includes increased feelings of well-being and reduced feelings of disconnection through an activity worksheet and a video clip. The children were asked to be thankful for everything that they have at home to help them learn and prepare them for school and life. A gratitude scavenger hunt was done by the children and was encouraged to read the list to them every day.

Z Webinar

Technophile

Learning PowerPoint presentation- Projects and presentations are a significant part of growing up. For kids, making a **PowerPoint Presentation** is a skill in itself.

For children, education can be fun through PowerPoint. In order to teach the kids different formatting features, effects and shapes option, the activity of making PPTs on their favourite topics done in the class. This activity helps students to enhance their logical thinking, problem solving, concentration & creativity. They made full use of the PowerPoint features, like video, sound, etc.
